The „Standing International Road Weather Commission“ (SIRWEC) is a forum for the exchange of information on the state-of-the-art technology between road engineers, climatology researchers and meteorologists. The objective of the biennial meetings is to promote improvements in snow and ice control operations with focus on specialised road weather forecasting and climatological measuring techniques as well as improvements in the organization of winter maintenance.

The Topics of the Conference are:

- I Climatology, Weather Conditions
- II Forecast Methods and Accuracy
- III Sensors and Equipment
- IV Presentation and Interpretation of Road Weather Information Data
- V Winter Maintenance Management Systems, Methods and Policy
